Overview

Pricing displays include a deadline date by which the fare must have a ticket issued to remain valid for the journey, this information will now be stored and displayable from the Stored Fare Quote and/or the Ticket Shell.

Customer benefit

• The last date to issue a ticket is easily identifiable

Detail and customer examples

When a PNR is priced, the response includes the fare date and last ticketing date. This information will be stored with the fare data and will be displayed from the Ticket Shell and/or Stored Fare Quote. A new line of text will be added to the display "LAST DATE TO TICKET" so that the date is easily identifiable.

This does not change Travelport Fare Guarantee policies, it may be that the last date for ticket issuance is beyond the Fare Guarantee deadline. The LAST DATE TO TICKET is based on the fare rule.

This change will be applicable for 4*, 4*TR, 4**, 4**TR, *R and 4*Q fare display entries.

As mentioned above, the LAST DATE TO TICKET is based on the fare rule and may be a date beyond that applicable for the Travelport Fare Guarantee. If an agent attempts to issue a ticket from a Ticket Shell or Stored Fare Quote that has expired, but is within the LAST DATE TO TICKET, the usual error response is given "UNA PROC-PAST TKTG DATE" and will need to be repriced.

Example 5: Priced on the 20th, LAST DATE TO TICKET 22nd, ticketing attempted 21st
