Overview

Travelport Smartpoint is the ultimate travel retail technology for today’s connected digital age. It puts the world's travel content at your fingertips and is packed with features that power better performance and enable you to create the perfect personalized service for your customers.

Travelport Smartpoint release 8.1 is fully PCI DSS compliant and is developed to work exclusively on an Internet Explorer (IE).

- Please Note: Computers running Windows 10 or higher may include MS Edge as the default browser. The MS Edge browser does not support Active X. Travelport Smartpoint for Worldspan requires Active X and is developed to work exclusively on an Internet Explorer (IE) browser. Please open Travelport Smartpoint Worldspan in an Internet Explorer (IE) browser.
  - IE Version 11 - Internet Explorer Recommended Version
  - Default Installed Location of Internet Explorer on Windows 10: "C:\Program Files (x86)\Internet Explorer\iexplore.exe"

Enhancements included in the Travelport Smartpoint for Worldspan v8.1 are:

- **Display the Journey time on the ePricing screen and the traveler email**
  - When available, the flight duration or Journey Time is displayed on the ePricing email tool and on the traveler email. Set a Fares Option default on the ePricing screen

- **Set a Fares Option default on the ePricing screen**
  - Select Public Fares only, Private Fares only or Public and Private Fares
  - Select Save Fare Option to save the selection to the computer (not the user)

- **Power Pricing entry in the Smart Screen will display the results in the Smart Panel**
  - Multiple options are displayed in the Smart Panel graphical format

- **Improved ordering of the Brand Attributes**
  - Brand Attributes are now displayed in a structured order making it easier for agents to compare attributes across Brands.

- **Price by Brand – Enable Brand modifier in the Branded Fares workflow**
  - Supported modifiers, PTC select, Currency override, Segment select, Penalty modifiers, Account code, Fare type modifiers.
  - Brand modifiers and tier level is included in the Brands and Ancillaries screen.
  - Pricing modifiers are included in the command line with the brand tier level after storing the fare in the PNR.

- **Update the Car Booking tool to display the entire tool on a single screen**
  - A continue button has been added to the top of the screen
  - Access to Settings has been relocated to the top of the screen
• **Support Brands in Ticket Exchange Plus when using Rapid Reprice**
  - New options for branded fares are provided on the initial exchange screen
  - The option to save the setting selected for future exchanges is now available
  - The Final Results screen includes the brands used in the new ticket

• **Updates to the Custom Itinerary**
  - Email addresses are located at the top of the screen
  - Select Grouped Itinerary – all selected travelers are included in a single itinerary
  - Select Separate Itinerary – individual itineraries are created for each traveler

• **Restrict the character length of the Login and Email address to a maximum of 250 characters on the Forgot Password screen**

• **A third Text Headline added to the Hotel Availability, Hotel Index and Hotel List screens**
  - Up to three Headlines can be displayed

• **United Airlines Bundles – Post Book**
  - Bundles are not available for all United destinations
  - Bundles must be purchased for all travelers in the PNR
  - United Bundles are not available on codeshare or interline/mixed carrier itineraries
  - Bundles are only available with economy cabin fares
  - Air ticketing is not required. Bundles can be purchased prior to ticketing.
  - United will issue an EDOC per passenger when ticketing is fulfilled.
  - The purchase is noted in the PNR within the *DAS

**Customer benefit**

Customers will benefit from these time saving enhancements.
