**Issue history:**
Version 01 issue date: 28-May-18
Overview

Select Travelport Search Control Console (SCC) rules are enhanced to enable the rules to be applied to a specified set of carriers instead of applying across all carriers enabling customers to more specifically target rules. Up to ten (10) carriers may be specified per rule.

- The following rules currently apply to all carriers. The default carrier setting for these rules will now be ‘All Carriers (**).’
  - Bias Undesirable Connection Points
  - Restrict Overnight Connection Times

- The following rules will have multi-carrier functionality added in a later release:
  - Online Bias Solution
  - Promote Direct Flights

- The following rules will not have multi carrier functionality added:
  - Maximum Number of Results
  - Restrict Specific Flight or Flight Ranges
  - Rule Authorization
  - Validating Carrier Override

Please note that this implementation will require that the SCC GUI will be offline for approximately two hours. A ‘system maintenance’ landing page will be displayed to SCC customers during this time. This impacts access to the GUI only. Enforcement of rules already applied will not be impacted.

Customer benefit

The ability to specify one or more carriers to which the rule applies provides greater flexibility in the creation of Travelport SCC rules to better meet your business needs.

Detail and customer examples

Rules that currently apply to all carriers

- The following rules currently apply to all carriers. The default carrier setting for these rules will now be ‘All Carriers (**).’
  - Permit Multi-Airport Connections
  - Restrict Airport or City location

- When creating a new rule of the above types, a textbox will be shown with ‘All Carriers (**).’ already present:
To limit the rule to only specific carriers, first the default selection must be removed by clicking on the ‘X’ control. Typing a carrier name or code brings up a list of matching carriers is shown, from the desired carrier can be selected. Up to ten (10) carriers may be added.

Once saved, the rule will now apply only to the selected carriers. Other carriers will not be affected by the rule.
